Dear Parents

Many of the schools in this area had to close for a day or two to be fumigated and sanitized again due to the report of a positive COVID-19. A person related to our school tested positive last week. The identity of such a person will be protected. I also tried to protect the learners that came for testing, but obviously people talk. The school was fumigated and sanitized on Saturday morning early. The instruction from the District Director was that we close the school for two days after the fumigation. The Department of Health came to test people at school yesterday. They were happy with the way that we had handled the process at school and the way that we do things every day at this school. There is no danger, more than usual, of getting the virus here at school. We do all we can to make sure that learners and staff are safe. There is no need for panic!!!! Should you have a serious concern, please contact me on 0798765309. I will answer your questions as honest and best I can.

Mrs M Van Wyk
Principal
